

Victor V9 : vacuum cleaner

The V-9 features an anti-static grounding system. This system protects the operator from static shock created through using the machine in environments prone to the build up of static electricity. The V-9 is a HEPA rated machine that exceeds IEC60312.

Technical Data

Capacity	9
Productivity (m ² /hr)	250
Voltage (v)	230/110
Motor Power (watts)	1000
Airflow (l/s)	58
Waterlift (mm)	1800
Noise Level (dBA)	60
Weight (kg)	6

HEPA Filtration as standard

The V-9 and V-E9 are both HEPA rated machines exceeding IEC60312. All machines are independently tested to ensure that the complete machine exceeds the HEPA standards as opposed to paying an allergy association for their approval.

V-9E Anti Static Feature

The V-9E features an anti-static grounding system. This system protects the operator from static shock created through using the machine in environments prone to the build up of static electricity.

Light & Manoeuvrable

Weighing only 6kg with 5 wheels for extra mobility and sturdiness, the V9 can be easily transported.

Complete with moulded handle that fits down pipe tubes
